DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11, 16, and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As to **claims 11, 16, 20**, the claimed limitations recited “**the method/system in a cellular mobile telecommunication system for cell planning and preparing for a cell split when a cell tends to get congested or overloaded, said method comprising the steps of: ... wherein maximizing the function... is the location of the user n.**” is a non-statutory with **a method in the steps** of that must be tied to system or apparatus. In this case, for example: a cellular mobile system following the steps of registering, and selecting in associated wherein maximizing the function that must be tied to structure or apparatus.

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a 101 statutory process, the claim should positively recite the other **statutory class (the thing or product) to which it is tied**, for example by identifying (by positively reciting in at least one of the steps) the **apparatus that accomplishes the method steps**, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Allowable Subject Matter

If claims 11, 16, and 20 overcome 35 U.S.C 101, and would be allowable if rewritten with qualify as a 101 statutory. The application will be considered for allowance.
